& Colour Sales Ltd.**

2800 - 31st ST., VERNON, B.C. 545-0664

# In times like these, it makes even more sense to choose a Zenith.

These days, you're probably even more determined than ever to make sure you're getting your money's worth.

That's why the features that have made a Zenith color T.V. such a good value are even more important today. For example, the Panorama II with its sweeping profile and sleek architectural lines offers a unique Ultramodern full-to-the-floor console with the look of smartness and sophistication. The contoured front with its smooth, curvilinear Silver color surface contrasts dramatically with the simulated grained Rosewood top and ends.

And the Chromacolor II offers you many other outstanding features such as:

An advanced Chromacolor picture tube. Delivers the

very brightest color picture in Zenith's long history.

100% Solid State Chassis. The most powerful we've ever built.

A unique voltage regulator. Protects chassis and picture tube when voltage varies in the home.

Convenient one button tuning. One touch brings back the purest brightness, contrast, tint and color level.

Zoom Space Command 1000 Remote Control. The press of a button increases your picture size by 50%.

But best of all in these times, is Zenith's energy saving feature. Chromacolor II actually uses less power than you'd need to light just two 75 watt light bulbs – less than half the power used by many older sets.
