Lochead second in AHL scoring

HALIFAX (CP) — New Haven Nighthawks' Bill Lochead got five goals and four assists in four games to move into second place, two points behind Nova Scotia Voyageur Norm Dube in the race for the American Hockey League's scoring title.

Figures released by the league Monday show Lochead with 39 goals and 39 assists for 78 points, two less than Dube, who did not get any points last week. Lochead leads the league in goal scoring with 39.

Keith Acton of the Voyageurs picked up two assists but still fell from the number-two spot into third place with 72 points. New Brunswick Hawks Bruce Boudreau continues to be No. 4 with 26 goals and 44 assists for 70 points, an increase of five points over his total last week.

Rich Shinske of the Adirondack Red Wings, a first-year franchise, is in fifth place with 61 points. Three players — Gordie Clark of Maine Mariners, Dan Metivier of Nova Scotia and John Stewart of Syracuse Firebirds — are tied for sixth place with 59 points each.

Rounding out the top 10 are Tim Trimper, formerly with New Brunswick and now playing for Chicago Black Hawks of the National Hockey League, and Gordie Brooks, of the Firebirds, with 58 points each.

Rick St. Croix of the Mariners leads the league's goaltending corps with a stingy 2.69 goals against average in 35 games. Nova Scotia's Rick Sevigny and New Brunswick's Murray Bannerman are tied for the second spot, each with a 3.00 average.

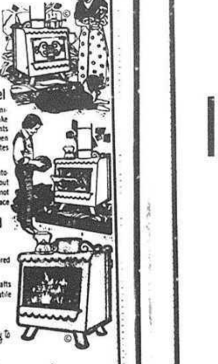
The Earth Stove©


Check these facts before you buy any other stove!
- The Earth Stove burns ⅓ the fuel of many stoves because pre-heating draft manifold promotes efficient and complete combustion like solid fuel power plants. Super-heated air prevents "cooling" of fire unlike manual "hole" drafts do. Even large chunks burn slowly and completely—eliminates frequent ash removal.
- Even temperatures thermostatic draft automatically maintains temperature you select. Levels out uneven cycle of wood combustion (Manual drafts cannot do this). Home temperatures more even than furnace heat.
- Burns 14 hours on one wood load
- Converts to open fire instantly
- Cook top just set thermostat to cooking heat desired — ideal for "Crock Pot" style cookery
- Wood gases not wasted Secondary drafts introduce oxygen above primary fire zone to burn volatile gases such as methanol, pyroligneous acid, etc.
- Air tight Prevents heat loss up chimney

The Earth Stove makes use of modern technology to improve the great institution of Wood Heat
